

Magdy Abo El-nour

Front-end web developer (React)

Address: 24 elgeesh St, Behera, EG **Phone:** 01276010396 **Email:** magdy.aboelnour246@gmail.com **LinkedIn:** <https://lnkd.in/d9uw4qtu>

started learning programming three years ago, and now I am studying at (Route) Academy the front-end by react course. Currently, I have started studying framework work (React), and then after that I will study the back-end by node.js course, now I am looking for a job as a front-end developer so I can gain Experience in this field I have created more than 17 websites so far, including using html5 and css3 as a start, and I kept them as they are in order to notice my progress. I also used libraries for css like bootstrap, and now I am learning tailwindcss, I used jQuery, and I used javascript in different systems. I also make sure that my sites are responsive on all electronic devices. You can take a look at my GitHub: <https://github.com/magdy246> and you can also see some of the sites that I presented in my CV.

Professional Experience

#Daniels, website

This website was challenge for me to do it in my course to do It by html and css only;
In this website I use HTML5, CSS3, bootstrap, fontawesome icons and I use native CSS to make the typing animation
Repo: <https://github.com/magdy246/danials.git>
Live Demo: <https://magdy246.github.io/danials/>

#Book-Mark, website

In this website I use crud system and validation system by native JavaScript and use a fit color from my experience in using colors
